

Overall Company Structure and Refined Product Line for Launch:

Company:

- **Name**: **Dan's 3D Art, LLC**

Main Product Categories:

1. **3D Printed Art and Wearable Items**:

- **Brand**: **For Memory's Sake**

- **Unifying Theme**: A collection designed to preserve and cherish memories through wearable and portable items.

Product Line: **For Memory's Sake**

- **Memory Coin**:

- **Description**: A round Echo Insert without any container. It serves as the insert itself, particularly for the Memory Vault, where the Echo Insert is the coin.

- **Memory Holder**:

- **Description**: A small, palm-sized keepsake container designed to hold personal mementos. It features an embossed and hand-painted image or inscription or can be made completely clear. This item has an echo image or inscription and does not use Echo Inserts.

- **Memory Safe**:

- **Description**: A modular, pocket-sized container that uses customizable disks known as Echo Inserts. These Echo Inserts can be graphics, inscriptions, or customized images and can be themed around souvenirs, memorials, or worship. Alternately, Echo Inserts can be a clear window.

- **Wearable Memories**:

- **Description**: A line of jewelry designed for continuous wear and is completely waterproof. Each piece serves as a personal reminder of cherished memories and has the option of an Echo Insert or a clear window.

- **Memory Locket**:

- **Description**: A necklace with a customizable locket that can hold an Echo Insert or display a keepsake through a clear window. Chains or bands are customizable and connect via KeepSafe clips.

- **Memory Vault**:

- **Description**: A bracelet or anklet with a capsule integrated into the band. It functions similarly to the Memory Holder or Memory Safe but is designed for continuous wear.

- **Keepsake Dangles**:

- **Description**: Small, egg-shaped capsules for piercings or other jewelry. They feature a small compartment, potentially all clear or solid with an embossed image. These do not feature Echo Inserts; the embossed image may be hand-painted or left unpainted.

- **Modular Components**:

- **Memory Links**: Snap-together links used for chains, bands, and other wearable configurations.

- **Echo Inserts**: Customizable inserts for all the wearable items, available in various designs or with personal images and inscriptions.

- ****Keepsafe Clips****: Secure clips that attach or connect different components of the jewelry or containers.

2. ****3D Printed Business Cards and Contact Coins****:

- ****Brand****: **For Business's Sake**
- ****Contact Cards****:
 - ****Description****: Unique 3D-printed business cards with embedded QR codes. These cards are designed to be durable and innovative, offering a modern take on traditional business cards. They can be customized with various designs and contact information.
- ****Contact Coins****:
 - ****Description****: Round, 3D-printed coins with QR codes for contact information. These serve as an alternative to traditional business cards, providing a compact and durable option for sharing contact details.

This refined structure keeps the focus on your main product offerings while ensuring each category is clearly defined and aligned with the overall brand vision. Let me know if there are any further adjustments or additions you'd like to make!
