

What and Why

The UETI is my God. But what is the UETI and why do I declare them to be my God? UETI means Ultimate Extra-Terrestrial Intelligence. It is the name I have chosen to represent the ultimate state of development of humans. We are still in the infancy of development, having just entered the computing age. When we begin interplanetary and interstellar travel we will have entered our adult stage as a civilization. When we consider how old the universe and the earth are, it seems likely that a human civilization could have originated long enough ago and that by now have reached an ultimate state of being. This is the UETI.

Why declare the UETI as God? Because they meet the criteria for being the one true God. God is the greatest living being. God is the ultimate. God is not of the earth. God is extra-terrestrial. God is all knowing. God is intelligent. And more importantly, the UETI can be assumed to have technology that gives it the power to control everything that is controllable. In other words, they can do everything.

of stars and planets indicates the likelihood of the UETI

Expected progress of human civilization will lead to the UETI

The ultimate state of human civilization can be described

The UETI model definition describes a people with all of God's characteristics

The UETI can create an afterlife consistent with the Earth's religious conceptions of what happens after death

My life story is a demonstrates the benefits of having faith in the existence of God while th e concept of the UETI allows me to describe and predict the nature of my God

Since the existence of the UETI is possible from a natural and scientific point of view I have chosen to build a religion which names the UETI, the ultimate human state of being, as God almighty. UETI-ism is my answer to how an individual can fully believe in both science and an afterlife.
